

Duopack

a package for two devices

How many devices we have?

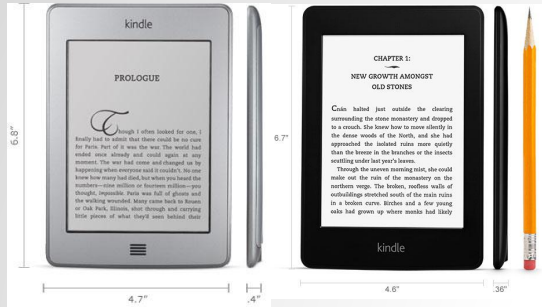

Average 2, or 3, or 4,

But basically, tablet and mobile are standard. More over, two tablets(one full functional, one ebook) are very popular. It's also recommended by us because of reading doesn't need lots of power, while ebook reader doesn't need full functions.

So we need a package to take them all.

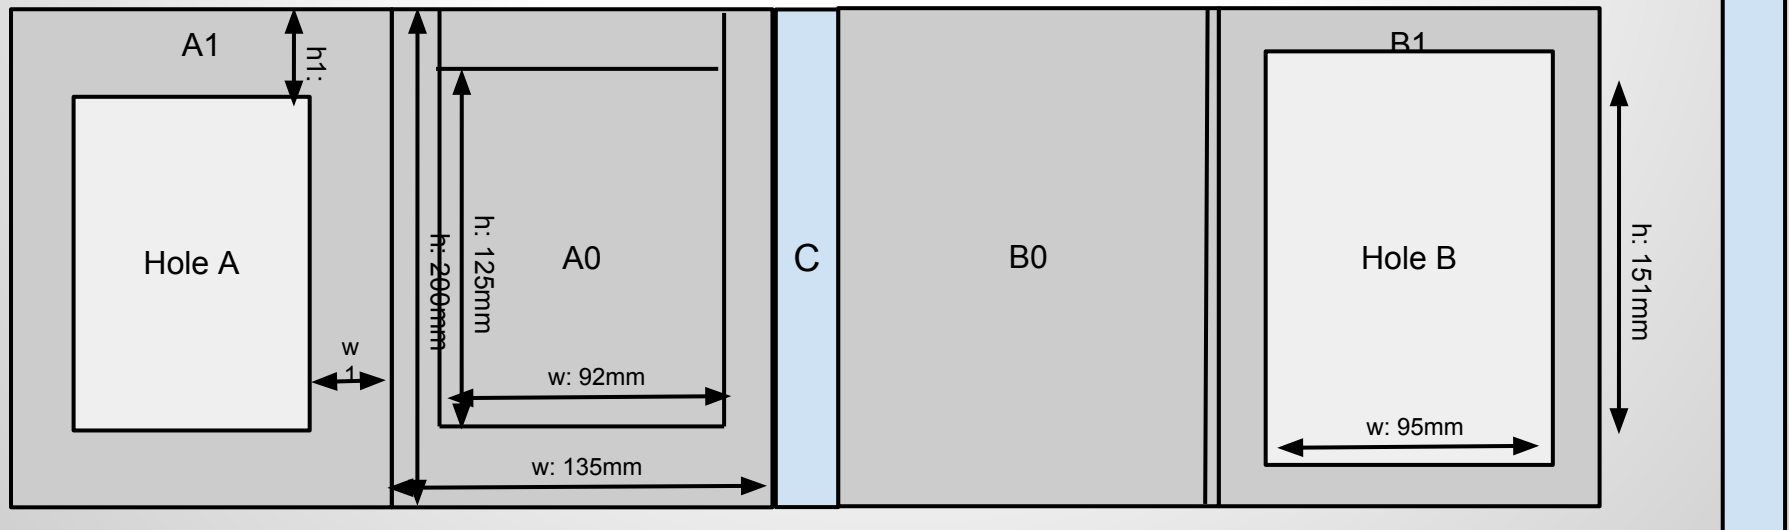

KPW: 169 mm x 117 mm x 9.1 mm
 KT: 172 mm x 120 mm x 10.1 mm
 N7: 198.5 x 120 x 10.45 mm
 IM: 200 x 134.7 x 7.2 mm

Duopack
 By @doriscafe, @isaac

If Hole A is for Kindle Touch, then the border space will be measured as: 125mm x 92mm, or if its for Kindle Paperwhite, the space should be: mmX mm.

If Hole B is for Nexus 7, then the border space will be measured as: 151mm x 95mm, or if its for iPad Mini, the space should be: mm X mm.

Final Solution

After trying leather and other materials(fabric), the only material that can hold devices are PVC case. Now the solution becomes easier: buying two cases fit for different devices, then use a binding method to connect them together....

This one

Front view with devices

Other issues to be solved

- Screen collision with each other
- Too heavy holding together
- Easy unmount-mount
